

Valued Quality. Delivered.

Find My Factory

## Get Instant Access to Largest Consumer Goods Factory Database with Find My Factory

### The Challenge

Professionals at consumer brands and retailers are often located a world away from the factories in which their toy, apparel, footwear, textile and hardline products are manufactured. This makes it difficult to have the most current information on a particular factory, for instance whether its capabilities have changed or if the factory's licensing and certification are current.

How can you ensure the information you receive about the factories that supply your consumer goods is not only authentic, but also accurate without actually visiting the factory yourself?

### The Solution

Intertek developed the Find My Factory mobile app for iPhone® and Android™, the largest living database of existing consumer product factories featuring more than 30,000 authenticated factory profiles, and growing by more than 1,000 per month. The Find My Factory mobile app was designed to meet the business and due-diligence needs of key decision makers in procurement and compliance to manage corporate values and supply chain risk. Every factory profile in the Find My Factory database contains an Intertek Trust ID, which represents the factory's authenticated identity. The Trust ID validates the factory's existence and basic information, helping to increase the transparency and traceability of the supply chain.

The information contained in Find My Factory – including factory address, number of employees, year of establishment, contacts, business license and photos – has been authenticated and can be viewed in each factory profile. Users can access unlimited viewing of factory profiles if they subscribe to Find My Factory. Currently, 1-month, 3-month and 12-month\* subscription packages are available at US\$39.99, US\$69.99 and US\$199.99 respectively.

*\*Currently, 12-month subscriptions are only available for iPhone® mobile devices.*
